

TRUE NORTH
Staying the Course, Charting the Future

Business and Technology Building

Every day, the Puget Sound area affects the future of the world through business innovation and execution. Companies like Amazon, Microsoft, Boeing, Costco, T-Mobile, Starbucks and more have headquarter campuses in our neighborhood. Northwest University is uniquely positioned to influence these industries by producing graduates who bring a biblical worldview and outstanding skills to these industries. In order to maximize NU's impact on our region we will prepare students for robust business leadership wherever God may lead them. To accomplish this, we will significantly enhance our College of Business and the Creatio Center for Technology, Media, and Design.

It is vital that Northwest University is viewed as both a strong producer of skilled believers, and as a forward-thinking leader in the Pacific Northwest. The Business and Technology Center will serve as a vibrant, creative hub with hands-on learning spaces including studios, labs, and workshops, all fully outfitted with cutting-edge technology and equipment. By prioritizing the new Business and Technology Center, we are confident that Northwest will become a major contributor in the success of this region and a choice college for business and technology majors.

Key Features

- **A State-of-the-Art Sound Stage and Green Screen Room** for film, video, and game production.
- A **Design Studio** incorporating the latest technology to encourage innovation and collaboration amongst all students majoring in a Creatio program.
- **A Product Design Workshop and Maker Space** filled with industrial design tools and 3D printers.
- **Robotics, Computer, and Usability Labs** for Computer Science, Artificial Intelligence, UX Design, and Data Science students These labs will serve as an entry point into the fast-paced world of tech.
- **Recording Studios** with state-of-the-art recording consoles and Dolby ATMOS recording and playback capabilities.
- **Video Editing Suites** with high resolution monitors and industry standard video software so that video production students are ready to accept clients as soon as they graduate.
- **Finance Lab with Bloomberg terminals** allowing business students to interact with the world of finance in real time.
